

Worldbuilding & Story Planning Tool

Background Research:

- Creative writers need ideas to write a story.
- Ideas tend to be messy and disorganised.
- Preparing a story setting is difficult.
- A tool to manage and organise ideas would be useful.

Objectives:

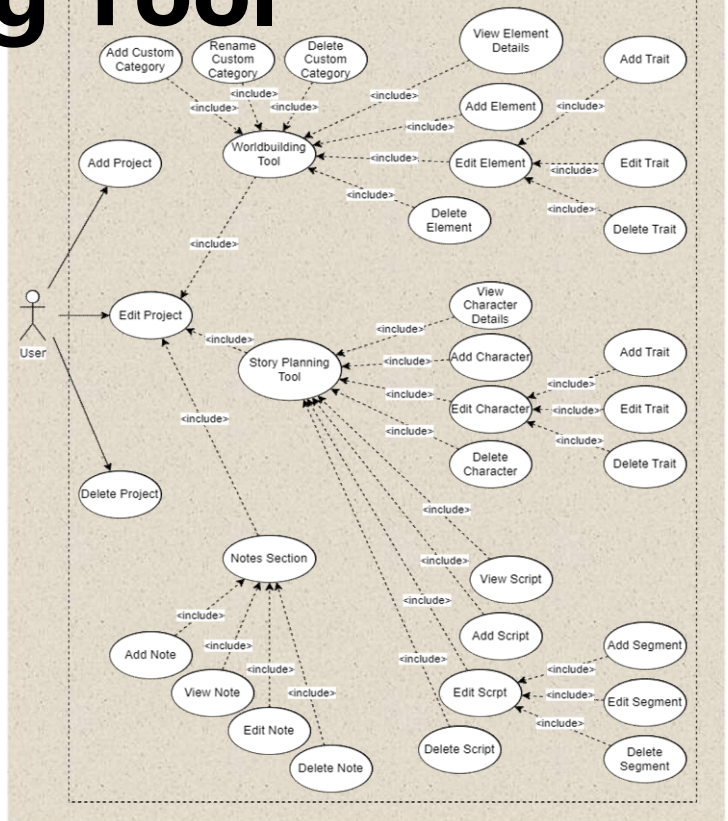

- Provide a solution to help writers organize and manage ideas for their stories.
- Provide a platform for writers to set up a customized setting for their stories.
- Provide an easier way for writers to write scripts.

Technology:

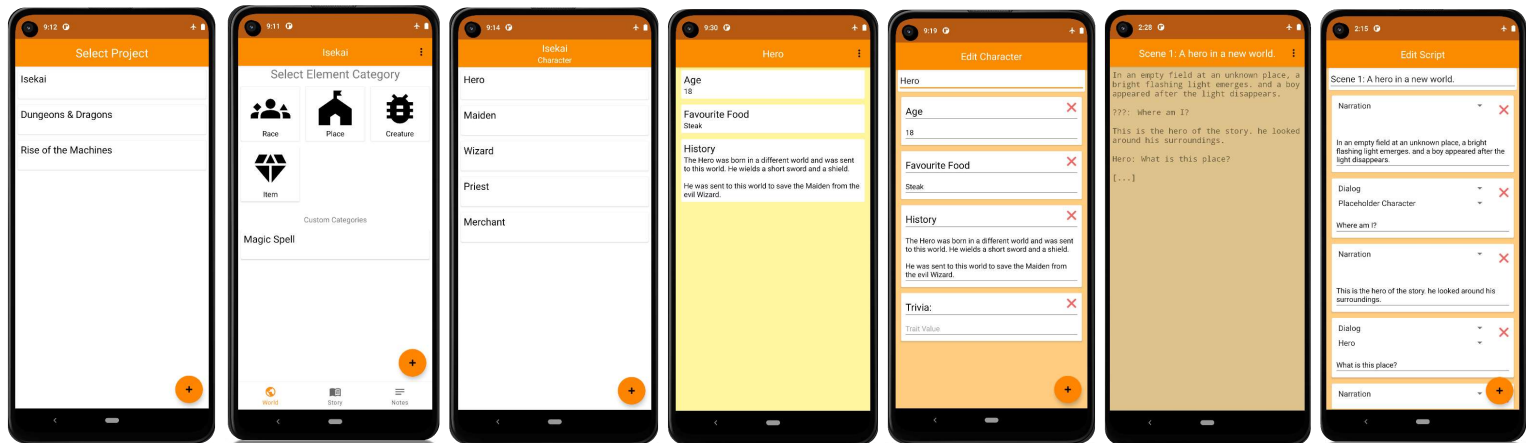

- Android Studio
- Java
- Android 9.0

Use Case:

Prototype:

Note:

- This system is still at its pre-alpha stage.
- Some functions such as sorting and arranging may not be available for the current application.
