Animal CITY Rescue
A Location-Based Animal Rescue Platform Powered by Crowd-Sourcing

SLOGAN

Saving Lives, One Paw at a Time - Uniting Hearts to Rescue the Helpless
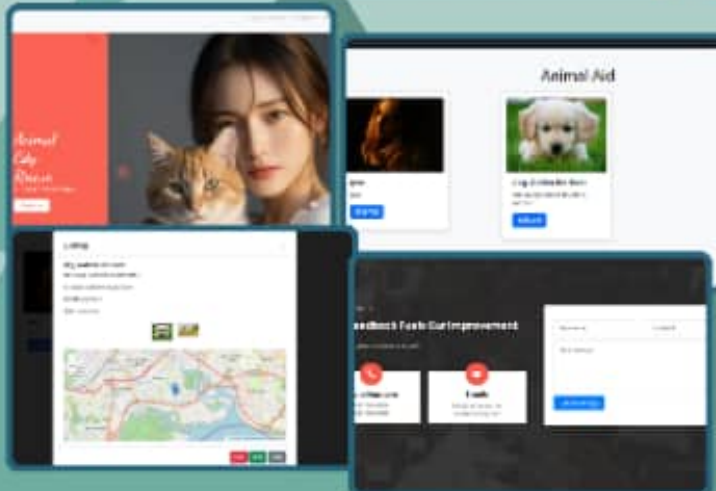

NOVELTY

Enhancing stray animal rescue through real-time location tracking to improve operations and empower community-based initiatives.

Additionally, moderating comments/posts about stray animals to fight misinformation.

PROBLEM STATEMENTS

There are many issues concerning stray animals, as there is no unified system in place to provide them with immediate assistance.

PROPOSED SYSTEM

Technology

Python · HTML with Flask · Laragon

OBJECTIVE

To identify, design and develop a comprehensive centralised animal rescue system.

Benefit

- Reporting stray animals promptly
- Involving volunteers actively
- Strengthening commitment to animal welfare
